

TACaccess provides a cost-effective and efficient solution for delivering mental health therapy to children and young people across the UK.

With an extensive network of accredited and thoroughly vetted therapists, TACaccess allows educators, institutions, and caregivers to easily source, select, and manage therapy providers for children and young people.

What we do

Our platform connects accredited specialised professionals with organisations and families caring for children and young people.

We streamline the management and payment processes for institutions, offering seamless, end-to-end processing for therapy services.

We reduce the costs associated with traditional therapy sourcing by at least a third.

We place the child or young person at the heart of the therapist selection process, fostering greater engagement.

Why should you use us

Through our extensive network of professionals, we can deliver thousands of therapy sessions nationwide.

We offer significant savings, improved service, and better value for money.

Our video-based therapist selection process empowers children, young people, and their caregivers, leading to greater commitment to therapy.

We eliminate the need for agencies by simplifying the payment, scheduling, and management of third-party therapy services.

Our Benefits...

- ✓ Has cheaper delivery costs, cutting out the cost of agency fees
- ✓ No registration or monthly subscription fees
- ✓ Gives children and young people a voice in their care
- ✓ Expedites care delivery
- ✓ Provides a straight-through payment process
- ✓ Simplifies case management
- ✓ Manages scheduling
- ✓ Provides a broad therapy offer with over 200 mental health therapists experienced in supporting children and young people
- ✓ Ready to connect to therapist accounting processes
- ✓ Streamlines the communication and workflow between institutions, children, young people and potential therapists

“TACaccess is an exciting and powerful tool aiming to help get the best mental health support for children and young people who need it most. It’s a great innovation for schools, colleges and universities.”

- Andrew Green, CEO of Chichester College
