

We will also be learning about daily and seasonal weather patterns in the UK.

In DT, we are going to be designing and making our own bridges.

In science, we will discover different materials and their uses.

Challenge:

Journeys

What are the features of everyday materials that you find outside of school? Can you create something from every day, recycled materials?

We will be using the book 'Journey' and 'Where my Wellies take me' for our main inspiration for writing.

Challenge:

Keep a look out for bridges when you go outside. Take a photo and bring it into school.

We will be exploring different materials and techniques, to find out how to make the strongest bridge.

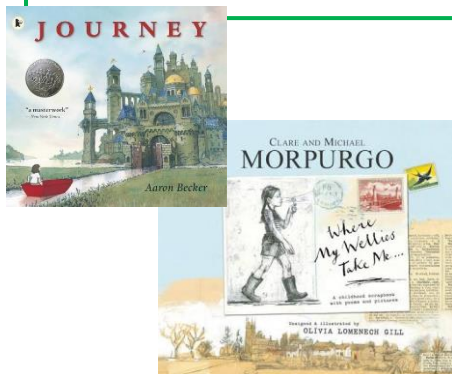

Places to Visit:

We will be writing our own narrative based on the text.

Challenge yourself! Can you go on a journey using just public transport? How many different modes of transport can you use?

We will take a walk on the South Downs - this is linked to our text 'Where my Wellies Take Me'

Fiction = a made up story

Non-fiction = facts
