

Friday 3<sup>rd</sup> April – Year 6 Science

To follow on from yesterday's work on Evolution, we would like you to do some research on the huge variety of life that inspired Charles Darwin's theories; that found on the Galapagos Islands.

Please create a fact file about an animal found predominantly (mostly) on the Galapagos Islands.

- Please include information of how they compare to other species of that animal and how they may have adapted to the island form.  
e.g. compare the Galápagos tortoise to other tortoise from around the world. How do they differ in size, colour, and behaviour?

Some ideas of what creatures you could research are;

Galápagos tortoise , Galápagos fur seal , Galápagos penguin, Galápagos sea lion, Marine iguana, Magnificent Frigate Bird, Galápagos Snake.

# Galápagos Island Animals

Galápagos Penguin

Galápagos Fur Seal

Galápagos Tortoise

Marine Iguana

Blue-Footed Booby

Whitetip Reef Shark

King Angelfish

Galápagos Snake

Giant Crab Spider

Bottlenose Dolphin

Flightless Cormorant

Galápagos Sea Lion

Magnificent Frigatebird

Animal News

Sally Lightfoot Crab

Lava Gull

American Flamingo
